60, 2020 House, Regent Street,  
Skinner Lane  
Leeds, LS7 1BB

## Work experience

### Backend Developer

Nov 2020 – Apr 2021

An Internship which targets creating a screen-based user interface for A&E wristbands for hospitals in the UK.

I was in charge of building the server architecture and server communication using tools such as GoLang and GraphQL, as well as building a dummy data generator tool using Python for API testing purposes.

### Full-stack Developer

Oct 2020 – May 2021

A Final Year Project which uses Spotify API as the baseline for song searches, song analyses and audio streaming.

The project is an Emotion-Based Music Streaming App which prioritises user's moods to play songs. For more reference on my personal projects, please visit my portfolio website

### Software Engineer

Aug 2021 – Present

Cheadle, England, United Kingdom

Voly are a unique company within the FinTech arena, providing an integrated accountancy software solution to the yachting industry. With global clients, it is important to be proactive and continually improve our system with new features and improved user experience. This secure, cloud-based system is set to be the leading accounts software in the yachting industry, streamlining the operations of yachting globally.

My role in this company is deal with fixing bugs, designing UIs, and technically implementing that in the company's application. Here, we use Svelte, Storybook for development and Jest for unit testing

## Skills

IoT

API

GoLang

GraphQL

User interface

Python

API testing

Svelte **Experienced**

Storybook **Experienced**

Node.js **Experienced**

## Languages

English **C1**

Bachelor of Science

University of the West of England

Oct 2018 – May 2021  
Bristol, England

I took part in Digital Media course to learn about anything technology wise.  
Subjects which were covered during my studying were Designing (Adobe suites), 3D modelling and animation (Maya, Blender, ZBrush,...), Creative Coding (p5.js), and web development and many more

IT (Networking)

Ho Chi Minh city International University

Sep 2016 – Apr 2018

I studied for a bachelor degree in Ho Chi Minh city, Vietnam for 2 years, then proceeded onto moving to the UK and continued my studying.

Because it was a connecting programme with the UK, I didn't finish my degree there in Vietnam. However, I was able to learn about C / C++, Assembly, and other low-level engineering skills such as Networking and Arduino.
